

ENR 5.2 Militære flyoperasjoner**ENR 5.2 Military Air Operations****1 Militære treningsområder**

“AMC Manageable” treningsområder er utformet i den hensikt å tillate militær treningsaktivitet uten å redusere flysikkerheten eller påføre sivile flyginger signifikante ulemper.

Treningsområder kan planlegges H24 hvis ikke annet er oppgitt. Planlagt bruk spesifiseres i daglig AUP/UUP. Faktisk aktivitet (tider og områder) kan avvike fra planlagt aktivitet. Informasjon om faktisk aktivisering kan innhentes fra lufttrafikkjenesten.

Rundt hvert treningsområde er det etablert en “Flight Planning Buffer Zone” (FBZ). Disse sonene setter IFPS i stand til å fange opp og avvise ikke-deltagende IFR reiseplaner med en ruteføring som vil berøre treningsområder som er planlagt aktive i henhold til gjeldende AUP/UUP.

I aktiviserte treningsområder kan et stort antall militære luftfartøy utøve treningsflyging.

Anm. 1: Aktiviteten vil normalt også finne sted i det ikke-kontrollerte luftrommet under aktive treningsområder.

Eksempel på aktiviteter i eller under områder er: luftkamp, simulert luft-til-bakke-angrep og lavflyging.

Av hensyn til flysikkerheten, bør informasjon om ikke-deltagende luftfartøy som befinner seg i det ikke-kontrollerte luftrommet under et aktivt treningsområde, formidles til relevant ATS-enhet. Denne vil videreformidle informasjonen til ansvarlig militær enhet.

2 Militær Lavflyging

Lavflyging med militære fly kan finne sted i høyder ned til 200 FT over bakken eller vannet, uavhengig av publiserte treningsområder.

3 Beskrivelse av områdene

For visuell fremstilling av de militære treningsområdene, se ENR 6.5-1 og ENR 6.5-3.

FBZ for hvert område har en ID som samsvarer med områdets ID, tillagt en Z på slutten; for eksempel EN D 501 - A1 og EN D501Z - A1Z.

FBZ er beskrevet nedenfor tilhørende område.

1 Military Training Areas

AMC Manageable training areas are designed to allow military training activity to be conducted without reducing safety or creating significant disadvantages for the civilian traffic.

Training areas are planable H24 unless otherwise specified. Planned use is specified in daily AUP/UUP. Actual activity (times and areas) may differ from planned activity. Real-time activity information may be obtained from the air traffic services.

A flight planning buffer zone (FBZ) is established around each training area. These zones enables IFPS to intercept and reject non-participating IFR flight plans with a planned routing touching training areas which are planned activated in accordance with current AUP/UUP

A large number of military aircraft may be operating inside activated training areas.

Note 1: The activity will normally also extend below the lower vertical limits of the activated training areas.

Examples of activity inside/below the areas are: Air Combat Training, Simulated Air to Ground Attacks and Low Level Flying.

In the interest of flight safety, information of the presence of any nonparticipating aircraft within the lateral limits, below an activated training area, should be brought forward to the relevant ATS unit. This unit will then relay the information to the responsible military unit.

2 Military Low Level Flying

Military low level flying occurs at altitudes down to 200 FT above ground or water, independent of any published training areas.

3 Description of Areas

For visual depiction of the military areas, see ENR 6.5-1 and ENR 6.5-3.

FBZ for each area has an ID that corresponds with the Area ID, with the addition of an Z to the end; e.g. EN D501 - A1 and EN D501Z - A1Z.

The FBZ is described below the corresponding area.
